

TrashTalk Forum – a web app to express your thoughts.

TrashTalk is a forum platform where users can freely express their thoughts and engage in discussions. The platform is built using **ASP.NET Core MVC 8.0** and provides a range of features for guests, registered users, and administrators.

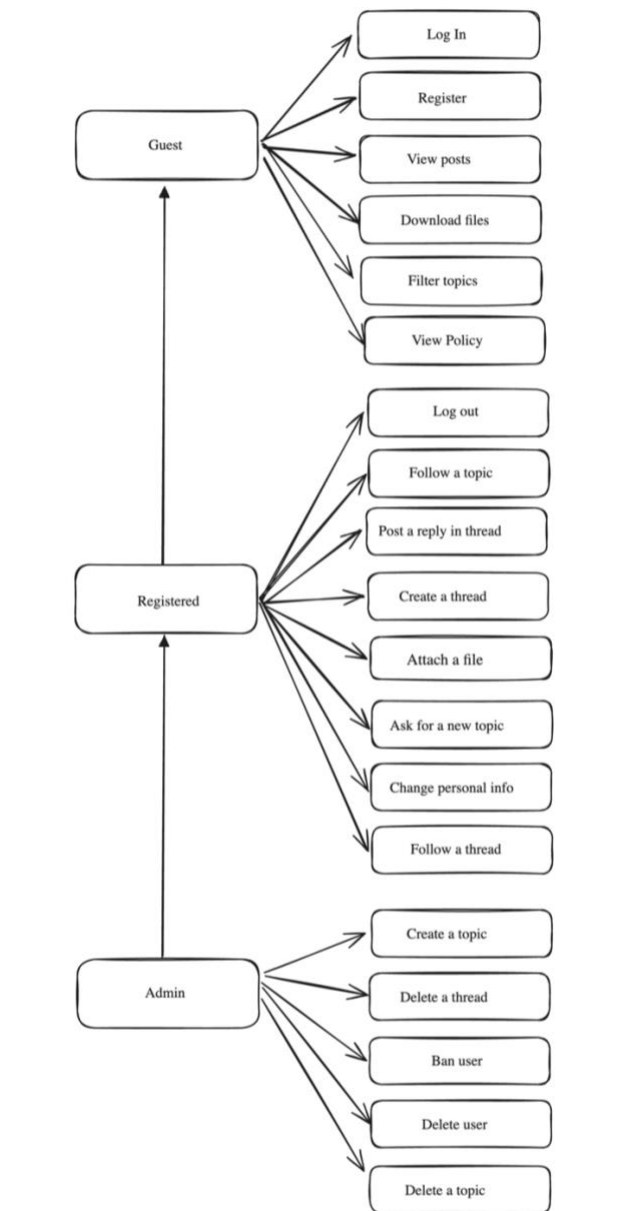

This SRS provides a structured overview of the project, including user roles, use cases, and functionality.

User Roles and Use Cases

Guests are users who are not logged in. They have limited access to the forum but can still perform some actions.

Defaults are registered and logged-in users. They have access to additional features for engaging with the forum.

Admins are users that have elevated privileges to manage the forum and ensure it runs smoothly.

TrashTalk — форум, де можна говорити, що забажаєш					
Actor	UseCase	Priority	Description	Action	Tests
